Re: Village of McComb WWTP  
**Notice of Violation**  
NPDES  
Hancock County  
2PB00002

September 29, 2015

Mr. Kevin Siferd, Village Administrator  
Village of McComb  
P. O. Box 340  
McComb, Ohio 45858

Dear Mr. Siferd:

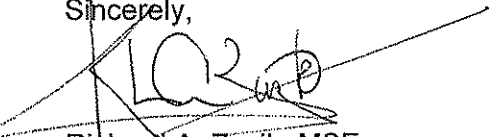

Our August 26, 2015, a National Pollutant Discharge Elimination System (NPDES) inspection letter informed you that your NPDES permit contains activities the Village must be doing to implement its Mercury Pollutant Minimization Program (PMP), and that we did not receive the 2014 annual summary report.

On September 21, 2015, the 2014 annual report was received and indicates that the Village did not conduct any of the required activities other than quarterly low level mercury effluent monitoring. This is a violation of NPDES permit Part II, Item P. (i) General Mercury Variance, which required site visits to known potential sources, distribution of mercury reduction educational material and coordination with the County Hazardous/Solid Waste Coordinator regarding household hazardous waste collection events.

The report acknowledges the above short falls and states that all five listed facilities will be inspected within six weeks and additional low level mercury samples will be collected in the collection system. Follow up site inspections will be made by the end of 2015. The Hancock County Landfill and Health Department will also be contacted for educational literature and to schedule dates for countywide collection sites.

Please notify me within two weeks upon completing the above noted commitments. If you have any questions, please contact me at 419-373-3020, or email at [rick.zuzik@epa.ohio.gov](mailto:rick.zuzik@epa.ohio.gov).

Sincerely,

Richard A. Zuzik, MSE  
Division of Surface Water
